Testing ISR@PRIM Primary ISPF Panel

- Userids supported by ISR@PRIM
 - **CO & DC** Operations Userids
 - **MS** Marketing Userids
 - **SP** Programmer Userids
 - **TS** zOS Tech Support Userids
 - All other Userids
- Use of **SETVAR TESTID @@???** command, where @@ is the first 2 characters of an SCDC Userid (or Blank to reset back to the current User's Userid).
- Hit *ENTER* a second time after the **SETVAR ...** command.
- You view, and options, are now the same as the Userid **@@???**
- To update the **ISR@PRIM** Panel:
 - Copy '**SYS3.TECH.EXEC(STARTUP)**' to your **ISPF.PROFILE** DSN
 - Allocate a personal **ISPF.ISPPLIB** Panel library
 - Copy '**SYS3.ISPF.ISPPLIB(ISR@PRIM)**' to your **ISPF.ISPPLIB**.
 - Log Off of TSO & then back on, this will allow the **STARTUP** REXX to add you **ISPF.ISPPLIB** DSN to your ISPPLIB DD concatenation, you are now using your personal copy of the **ISR@PRIM** Panel.
 - Use the ISPF Testing facility (**=7.2** or **ISPFTest**) to view/validate any changes you have made.
 - Promote the changes back to '**SYS3.ISPF.ISPPLIB(ISR@PRIM)**', if you need additional testing from other Techies, you can Promote to '**SYS3.TECH.ISPPLIB(ISR@PRIM)**' first.
